## THESE WEEDS ARE DESTROYING YOUR GAME HABITAT!

*Be on the lookout for noxious weeds!*

*Non-native invasive plants, which replace native vegetation creating poor habitat for deer, elk and other game animals.*

Dalmatian Toadflax  
(*Linaria genistifolia*)

Rushskeleton Weed  
(*Chondrilla juncea*)

Spotted Knapweed  
(*Centaurea maculosa*)

Leafy Spurge  
(*Euphorbia esula*)

### YELLOW STARThISTLE IS DESTROYING YOUR BIG GAME HABITAT!

Yellow starthistle is a non-native plant that has become established throughout the West. It takes over native habitats, ruining it for big game species and other wildlife. Yellow starthistle currently infests nearly 300,000 acres of Idaho wild lands!

We need your help to keep it from spreading to new places.

How you can help:

- Drive only on roads and trails away from weed infested areas.
- Clean your machine. Make sure you carefully clean your ATV or truck before taking it to a new area. Even a few seeds can spread this noxious weed to new areas.
- Remove weed seeds from your pack animals, dogs, hiking boots and other gear.
- Carry only certified weed-free hay for pack animals.
- Report new weed infestations to your local county weed superintendent located under County Government in the phone book.

Pulling together, we can stop the spread of this deadly invader and help protect big game habitat.

Join us in the fight against noxious weeds and the threats they pose to Idaho's agriculture, rangelands, recreation and wildlife habitat. Phone the Idaho Weed Awareness Campaign
